

Nagios XI // Edition Comparison

+1.888.624.4671 (US)
+1.651.204.9102 (INTL)
www.nagios.com

Nagios XI delivers powerful features and is available in two editions: Standard and Enterprise.

Features	Standard	Enterprise	Benefit
Configuration Rollback	✓	✓	Allows administrators to easily recover from configuration errors by rolling back to known good snapshots.
New Wizards and Components	✓	✓	New Wizards and components add additional functionality and are automatically installed and upgraded with each new release.
Bandwidth Usage Report	✓	✓	Provides detailed daily, monthly, quarterly, and yearly bandwidth reports for switch and router interfaces.
Executive Summary Report	✓	✓	Provides management, administrators, and decision makers with at-a-glance visibility into recent alerts, availability, and activity.
Custom Action URLs	✓	✓	Provides users with ability to add customized links to each Host and Service.
Custom Host and Service Actions	✓	✓	Allows administrators to define commands and actions that are readily available to user for troubleshooting and fixing problems, opening trouble tickets, and more.
Custom Views	✓	✓	Enables users to create rotating displays of dashboards and tactical displays as well as custom URLs.
Custom Dashboards	✓	✓	Enables users to create custom tactical displays using a variety of built-in dashlets, including graphs, status summaries, gauges, maps, and more.
Advanced Dashboard Deployment	✓	✓	Allows administrators to deploy custom dashboards to other users while syncing to a master Admin dashboard to ensure users receive relevant, up-to-date information.
Instant Remote Host Access	✓	✓	Provides users with instant remote access to monitored devices via RDP, VNC, Telnet, or SSH.
Emailed Reports	✓	✓	Allows users to quickly email reports to themselves, team members, and other decision makers.
Enhanced Configuration GUI	✓	✓	Improved GUI for monitoring configuration makes complex tasks easier.
Mobile Interface	✓	✓	Provides compact, intuitive interface for mobile phones and devices.
Escalation Wizard	✓	✓	Allows users to easily create notification escalation policies.
Remote Passive Monitoring	✓	✓	Provides easy-to-use monitoring of remote machines and devices on external networks without firewall modifications.
Capacity Planning Report	✗	✓	Provides the ability to visualize and alert on projected future performance, enabling you to predict upgrade requirements.

Features	Standard	Enterprise	Benefit
Web-Based Server Console Access	⊗	☑	Provides fast, web-based access to the XI server console for performing upgrades and maintenance.
Advanced Business Process Monitoring	⊗	☑	Provides advanced reporting of critical business processes with automatic group synchronization, advanced grouping logic, and advanced permissions.
Scheduled Reports	⊗	☑	Provides regularly scheduled reports to be sent to decision makers, management, and administrators via email.
Scheduled Pages	⊗	☑	Allows users to schedule any XI web page to be delivered via email as PDF attachments on a scheduled basis. Great for sending dashboards, custom screens, and more.
Custom Action URLs	⊗	☑	Provides users with ability to add customized links to each Host and Service.
Bulk Modification Tool	⊗	☑	Allows administrators to quickly modify attributes of thousands of Hosts and Services in a few simple steps.
Bulk Renaming Tool	⊗	☑	Allows administrators to quickly and efficiently rename Hosts and Services while retaining historical performance and alert data.
Bulk Notification Settings Tool	⊗	☑	Allows administrators to quickly deploy notification settings to multiple users in a few simple steps.
Audit Logging	⊗	☑	Provides an audit trail of changes and modifications to ensure policy compliance.
Automated Decommissioning	⊗	☑	Ensures network monitoring workflow remains clean and organized by automatically removing configurations for Hosts and Services that are in a problem state for too long, minimizing false positives and providing greater network clarity.
Service-Level Agreement (SLA)	⊗	☑	Provides users the ability to measure effectiveness of specific Hosts, Services, and business processes to determine if service-level agreements are being met. Schedule reports to be sent on a recurring basis for quick and accurate network performance statistics.
Managed Reports	⊗	☑	Administrators can manage scheduled reports in one place and easily copy reports to other users.
SNMP Trap Interface	⊗	☑	Configure your SNMP trap setup and view the SNMP traps coming into your XI system with the new trap interface.

A Nagios business day is 9 a.m. – 5 p.m. CST on Monday through Thursday. On Fridays and any workday prior to an observed company holiday, business hours are 9 a.m. – 2 p.m. CST. For a list of observed holidays, please visit: <https://www.nagios.com/holidays/>.
